

*New Thought is a spiritually motivated way of life that embraces  
the ancient wisdom traditions of east and west.*

We embody the belief that consciousness is elementally creative and reciprocates thought,  
empowering us to co-create with the Divine to shape the realities of our lives.

The Association for Global New Thought (AGNT) is committed to global healing achieved  
through personal transformation, community-building, interfaith, intercultural, and  
interdisciplinary understanding, and spiritually guided activism.

\*\*\*\*\*

AGNT was born 20 years ago based on the revolutionary idea that universal spirituality is our common vision -- divisions among Religious Science, Unity, and other branches of New Thought/Ancient Wisdom limits that vision and may prevent us from reaching our full potential as a spiritual family.

For two decades, powerful individual ministers from within Unity, Centers for Spiritual Living, and Agape, and others have worked together under the banner of The Association for Global New Thought, inspiring congregations worldwide to participate in a mission of spiritually motivated social activism.

AGNT has gone a long way in evolving the character of New Thought beyond a magnificent spiritual practice to a platform for ENGAGEMENT in the pressing needs and issues of our communities and our world.

As we approach a landmark two decades into the new millennium, we are taking the next (r)evolutionary leap, unifying within our field of leadership the voices of Unity World Headquarters, Unity Worldwide Ministries, Centers for Spiritual Living, Agape International Spiritual Centers, and Science of Mind Magazine. We hope that leaders from Universal Foundation for Better Living and Affiliated New Thought Network will join us soon.

Together, we begin a new journey that does not just represent powerful ideas contributed by individual churches and spiritual centers around the nation, but one that embodies a Whole System giving unified and coherent expression to the important principles, practices, and actions of interconnectedness, diversity, and socially conscious evolution.
